

**Annual Reports on the Progress of Chemistry, Section B** covers recent developments in organic and bio-organic chemistry. The full range of research is included:

- synthetic methodology
- reaction mechanisms
- theoretical organic chemistry
- natural products
- bio-organic chemistry
- supramolecular chemistry

Top authors from around the world offer their approach to, and views of, the particular subject, written to a very high standard.

## Annual Reports on the Progress of Chemistry

**Annual Reports on the Progress of Chemistry** provides comprehensive coverage of the most recent developments in the classical fields of chemical science. Published in three sections, this unique service offers critical assessments from expert international authors, on an annual basis. The short, easily accessible articles combined with the depth of information make Annual Reports an invaluable teaching resource.
