Introducing...

...the Frontiers journals, a unique collaboration between the Chinese Chemical Society and the Royal Society of Chemistry, aiming to publish a series of high impact quality chemistry journals that showcase the very best research from China, Asia and the rest of the world to an international audience. Each journal has a top Chinese institute in the relevant field as part of the collaboration.

“This collaboration between CCS and RSC celebrates a new phase in scientific growth, and will provide researchers with unparalleled opportunities for global visibility and international collaboration.”

Dr Robert Parker, Royal Society of Chemistry chief executive

“As the central science, chemistry will continue its expedition of discovery and creation, providing powerful and reliable support for mankind's efforts in sustainable development and improving the quality of life.

China has the largest number of highly educated chemists and is now ranked among the top countries in the world in chemistry research. The number of manuscripts originating in China has sharply increased over the last decade.

The new Frontiers journals owned by Chinese Chemical Society and our partners will benefit the chemistry community.”

Professor Jiannian Yao, Chinese Chemical Society president
